AutoLevelUp

Every Student Deserves to Level Up.

AI-Powered Learning + Intelligent Grading -- Built for Schools

autolevelup.in

Schools Face Four Problems Every Day

Every Student, One Speed

Every student in the same class moves at the same pace. The fast learners get bored. The struggling ones fall behind quietly. Neither reaches their best.

Weekends Lost to Marking

Your teachers spend weekends marking papers instead of preparing lessons. Students get feedback days after the exam -- when the learning moment has already passed.

Students Who Slip Through the Cracks

The student falling behind won't ask for help. By the time declining scores and missed assignments are noticed, a small problem has become a big one.

Parents Who Find Out Too Late

Parents hear about their child's struggles once a term -- at report card time. By then, a small problem has become a big one. They're reacting to failure instead of preventing it.

Auto-LevelUp solves all four.

Two Platforms. One Student Profile.

LvlUp Spaces

Continuous AI-Powered Learning

A learning platform where every student gets a personal AI tutor, courses that adapt to their pace, and progress their teachers can see in real time.

- 15 ways to learn -- quizzes, essays, coding, audio, and more
- AI tutor that guides students, never just gives answers
- Difficulty adapts to each student -- always the right challenge
- XP, streaks, badges, and leaderboards that make studying rewarding
- Struggling students flagged before they fall behind

AutoGrade

Intelligent Exam Grading

Scan any handwritten answer sheet with a phone. AI extracts questions, maps answers, grades every response with detailed feedback -- in minutes, not days.

- Scan answer sheets on any phone -- no special hardware
- AI reads and grades an entire class of papers at once
- Flexible grading standards that match your teaching style
- Teachers override any grade with one click -- you decide
- Every student gets detailed, per-question feedback

8 min	4	5
Class Graded	Rubric Modes	Pipeline Steps

Both platforms share one student profile. What a student learns shapes their exam prep. How they perform on exams shapes what they learn next.

What Students Learn, How They Learn It

15 Question Types

Auto-Graded (9 types)

MCQ -- Recall, concept checking

Multi-Select -- Analytical thinking

True/False -- Concept validation

Numerical -- STEM calculations

Fill Blanks (typed) -- Vocabulary, recall

Fill Blanks (dropdown) -- Scaffolded recall

Matching Pairs -- Term-concept linking

Jumbled Order -- Processes, sequencing

Group Options -- Classification, sorting

AI-Graded (6 types)

Short Text -- Short written answers

Essay -- Extended responses, rubric feedback

Coding -- Programming with test cases

Audio -- Oral, language assessment

Image/Diagram -- Science, geometry, art

Chat Agent -- Deep reasoning, Socratic

5 Story Point Modes

Standard
Guided lesson, no time pressure

Quiz
Graded, instant feedback

Timed Test
Countdown, auto-submit

Practice
Unlimited attempts, best score

Test
Structured graded test

AI Features

AI Tutor

A personal learning companion available 24/7. Instead of handing out answers, it asks the right questions to help students figure things out on their own.

AI Grading

Grades written work, code, audio, diagrams, and more -- using the standards your teachers set. Works across 4 grading styles to match any subject.

Adaptive Difficulty

Watches how each student performs and adjusts the challenge in real time. Harder when they're ready. Gentler when they need support.

Gamification

Every lesson completed, every question answered, every day of study earns visible progress. Students see themselves getting better -- and that keeps them coming back.

XP System

Points for every question, bonus for streaks and perfect scores

Levels

Progressive unlocks based on cumulative XP earned

Streaks

Daily login and activity tracking builds consistency

Badges

6 categories, 5 tiers from Bronze to Diamond

Leaderboards

Weekly, monthly, and all-time rankings

Badge Rarity Tiers

Common | Uncommon | Rare | Epic | Legendary

From Scan to Feedback in 8 Minutes

1. **Scan**
   Teacher uses any phone to photograph answer sheets via the guided PWA app. No special hardware needed.
   Instant

2. **Extract**
   AI reads the question paper and automatically identifies every question and its marking criteria.
   Under 60 seconds

3. **Map**
   AI matches each student's answer to the right question -- even if they wrote out of order.
   Automatic

4. **Grade**
   AI grades every question simultaneously using your marking standards. An entire class graded at once.
   8-15 minutes for full class

5. **Review and Release**
   Teacher reviews, overrides where needed, and releases results to students with PDF reports.
   Teacher-controlled

40 students. 10 questions each. All 400 answers graded at the same time.

Watch the progress in real time as each answer is graded.

4 Ways to Grade

Criteria-Based

Grade each question against specific marking criteria you define. Best for structured exams.

Dimension-Based

Evaluates answers across four key areas: accuracy, completeness, structure, and clarity. Best for essays and case studies.

Holistic

A single, overall assessment of answer quality. Best for creative writing and open-ended work.

Hybrid

Combines specific criteria with overall quality assessment. Best for exams that need both detail and big-picture evaluation.

What Every Student Receives After an Exam

Every graded answer comes with:

1. **Score** -- their mark with a clear breakdown of how it was earned
2. **Strengths** -- what they did well
3. **Next Steps** -- specific, actionable advice for doing better
4. **Key Takeaway** -- the one thing to remember from this question
5. **Mistake Pattern** -- what kind of error was made, so they learn to avoid it
6. **Review Flag** -- answers the AI is less sure about are sent to the teacher

AI grades. Teachers decide.

Your teachers can override any grade with one click. Every change is documented. Teachers always have the final word.

For Teachers

Your teachers spend hours -- sometimes entire weekends -- marking papers. Auto-LevelUp gives them that time back. What used to take all weekend now takes 8 minutes. And it's not just faster -- it's smarter. The platform shows them which student is falling behind, which question tripped up the class, and where to focus next.

- Grade an entire class exam in 8-15 minutes instead of a full weekend
- AI surfaces at-risk students before they fall hopelessly behind
- Build reusable question banks, rubric presets, and content spaces
- Per-question analytics reveal which concept confused the most students
- Full academic control: override any AI grade with a documented reason

A Day With Auto-LevelUp

How Auto-LevelUp fits into a teacher's day	
7:00 AM	Open the dashboard. See which students asked the AI tutor for help overnight -- and what they were stuck on.
9:00 AM	Scan yesterday's exam papers with a phone during a free period. Grading starts automatically.
12:00 PM	Review the graded results at lunch. Adjust 3 scores that need a human eye. Release results to students.
4:00 PM	Two students flagged for declining performance. Schedule a conversation with each before the week ends.
5:00 PM	Go home. Spend the evening with family instead of marking papers.

For Students

Learning should feel like progress, not punishment. With Auto-LevelUp, every question answered earns XP. Every day of study builds a streak. And when students get stuck at midnight, a patient AI tutor is right there -- asking the right questions, not handing out answers.

- AI tutor available anytime -- patient, helpful, never just gives the answer
- Difficulty adapts in real time so every student stays engaged
- XP, streaks, badges, and leaderboards make studying genuinely rewarding
- Exam feedback explains exactly where marks were lost and how to improve
- Practice mode lets students retry without fear -- best score is what counts

The Student Journey

1. **Open App**
   See your streak, your level, and exactly what to work on next.
2. **Choose a Subject**
   Pick a subject. Jump back in where you left off, or start something new.
3. **Learn**
   Learn at your own pace. Questions get harder as you improve and easier when you need support.
4. **Get Feedback**
   Get instant feedback on every answer. Stuck? Ask the AI tutor -- it guides you, never spoils the answer.
5. **Level Up**
   Earn XP, unlock badges, climb the leaderboard. Watch yourself level up -- for real.

For Parents

You shouldn't have to wait until report card day to find out your child needs help. Auto-LevelUp tells you the same day a score drops. If your child stops studying for a week, you'll know before it becomes a pattern. And instead of vague concerns, you get specific advice: "Practice the Electrolysis chapter -- it appeared in 3 of the last 4 low-scoring answers."

- Real-time alerts when exam scores drop -- no more waiting for report cards
- See strength areas, weak topics, and AI-generated recommendations per child
- Side-by-side progress comparison for families with multiple children
- Download PDF progress reports for tutor sessions and parent-teacher meetings
- Choose what you hear about -- exam results, weekly summaries, and more

Alert Types

Score Alert
Same-day notification when your child's exam score drops below expectations

Activity Alert
A heads-up when your child hasn't studied in a while -- before it becomes a pattern

Early Warning
An alert when multiple signs suggest your child may need extra support

Good News
Celebrations too -- know when your child earns a badge, levels up, or hits a study streak

For School Admins

Running a school means managing hundreds of people, tracking performance, controlling budgets, and keeping the board informed. Auto-LevelUp puts all of it in one place. No more spreadsheets for rosters, end-of-term scrambles for reports, or surprise AI bills. You see everything. You control everything.

- School-wide performance at a glance -- see which classes thrive and which need attention
- Complete cost visibility -- know exactly what AI grading costs, down to the penny
- Decide who can do what -- senior teachers get full access, new staff start with guardrails
- Export any data for board reports, audits, or academic records
- Add hundreds of students and staff at once with a simple file upload

Cost Transparency

Per Exam
See exactly what each exam costs to grade -- no hidden charges

Per Student
Know the cost of grading each individual student's paper

Per Month
Monthly spending summaries ready for your budget report

Four Steps to a Smarter School

1

See It In Action

We show you how Auto-LevelUp works for your school

2

Set Up Your School

We help you configure classes, staff, and permissions

3

Add Your Students

Upload your student list and parent contacts in minutes

4

Go Live

Teachers start creating. Students start learning. You start seeing results.

Weekends Back

Teachers grade in minutes, not days

Every Student Visible

Struggling students flagged before they fall behind

Parents In the Loop

Real-time updates, not end-of-term surprises

Budget Under Control

Complete cost visibility, always
